

### Question C:

I have 2 files **index.html** and **test.js**. When I try to click on the button “Add New Person” on the index.html page, I receive **no response** back in my console and **no errors**. What I should be getting is:

```
{message: add the user: Billy Bob}
```

**What is the problem and how can I fix it?**

Note: You can assume that the server is set up correctly with all the modules installed and included.
