Question C

Problem: I have a handlebars page with an unordered list. I have linked in my handlebars page the following jquery code.

The code is supposed to select my list item with the class person and change the background colour.

I am 100% certain that the jQuery line of code to <mark>select and change</mark> the list item is <mark>correct</mark>.

However, when my page loads, the change doesn't happen.

Look through the snippet of code in **main1.js** and **home.hbs.**

What is the problem?

_____

How do I fix it?

_____

<mark>Hint: We can assume that handlebars, and all necessary modules have been installed and setup correctly. Any code that is not included is assumed to work as intended.</mark>

This is what the page looks like:

- Tom
- Frank
- Bill
- Ted
- Leon

This is what the page <mark>should</mark> look like:

- Tom
- Frank
- Bill
- Ted
- Leon
