Instructions:

You will be given a random selection of questions with problems in each.

<mark>**What I want is for you:**</mark>

<mark>-**to Identify the problem** (write a couple sentences describing what the problem is. I don't want a single word answer, I want thought going into your problem solving)</mark>

<mark>-**Supply a solution to the problem** (I want to see your code to fix the problem and describe why this code will fix it.)</mark>

I suggest keeping answers in a word document while working on the issues. Then when you are finished, post your answers in blackboard's test text boxes.

If you run into any problems or need help message me on slack.
